

iCore Training Winter/Spring 2012

The iCore Training program covers two stages:

- **Stage 1: Adapter training**, 3 days.
The objectives of the course are that participants learn how to configure integrations by using iCore Adapters – basic as well as advanced.
- **Stage 2: Developer training**, 2 days.
The objectives of the course are that participants learn how to parse messages and develop complex integrations using iCore Developer.

Participants must have completed Stage 1 before entering Stage 2.

The following training sessions are scheduled:

Location	Week	Adapter training	Developer training
Göteborg	5	2012-01-30 – 2012-02-01	2012-02-02 – 2012-02-03
Stockholm	10	2012-03-05 – 2012-03-07	2012-03-08 – 2012-03-09
Göteborg	16	2012-04-16 – 2012-04-18	2012-04-19 – 2012-04-20
Stockholm	22	2012-05-28 – 2012-05-30	2012-05-31 – 2012-06-01

The training program may be subject to change due to customer demands and number of participants.

Prerequisites for the training are as follows:

Participants are to bring a laptop with

- Windows XP or later. Some exercises are based on iCore .net adapters and the .net framework version 3 requires at least Windows XP.
- Microsoft SQL Server 2000 or later (incl. latest service packs). Also ensure that your SQL Server can be logged on in Windows as well as SQL Server mode [SQL server properties/Security /Authentication – Mixed Mode]. Consequently, you must know the login for the SQL Server. If you do not have a database installed, you may install SQL Server 2005 Express during the training. If this is the case, **please inform us before the training so that we can prepare installation of Northwind sample database**, which will be used in several exercises.
- Enterprise Manager
- The sample database Northwind (if not installed, see above)
- MSMQ (configured in the operative)
- A wireless network card, WLAN
- Possibility to connect towards an e-mail account, for example web mail (this is no requirement, but will make it easier for the participant)

If you have never used XML before, please take a couple of minutes at home to get acquainted with the technique. It will make the training more rewarding, as XML is a major element in several exercises.
